Inside the DAO of Decrypt – Decrypt

In brief Decrypt is experimenting with its own DAO as a way of empowering users to vote on what content they want to see next. Decrypt invited NFT holders to cast their votes via Snapshot. Voters chose "What are Flash Loans" as the next Learn article they want to see.

Decentralized autonomous organizations (DAOs) | ethereum.org

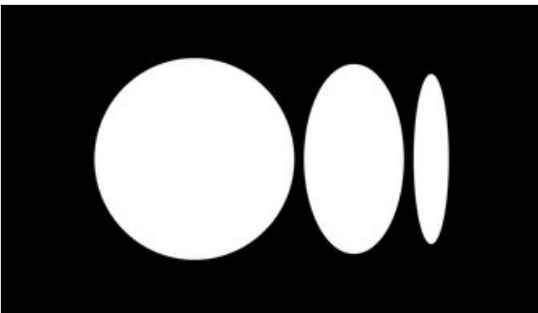

Usually flat, and fully democratized. Usually hierarchical. Voting required by members for any changes to be implemented. Depending on structure, changes can be demanded from a sole party, or voting may be offered. Votes tallied, and outcome implemented automatically without trusted intermediary. If voting allowed, votes are tallied internally, and outcome of voting must be handled manually.

Prioritizing Cooperative > Competitive Advantage in the HAUS

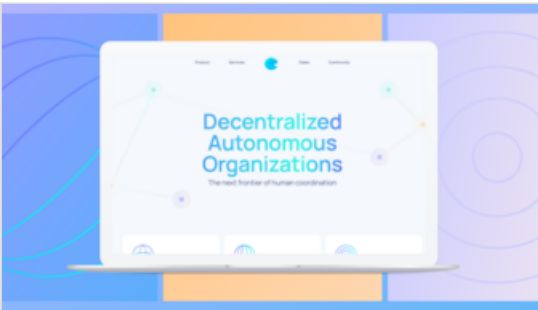

Momentum is picking up inside the DAOhaus ecosystem. Last Monday, August 9th, marked the official launch of PoolHAUS, the first DAO sanctioned liquidity provision experiment for HAUS supporters to earn rewards for their participation. We've released some new updates that change the way we view the Vault/Bank UI, improving visibility for users.

What Are DAOs? The Future of Global Organizations Explained | Crypto Briefing

DAO is an abbreviation for "Decentralized Autonomous Organization," a community which interacts around hard-coded rules encoded in the blockchain. DAOs have seen exponential growth in 2021, most notably from DeFi protocols delegating governance to their communities. While DAOs have so far mostly been connected to crypto, traditional organizations could benefit from the technological innovation of blockchain-based governance.

DAOhaus | DAOhaus

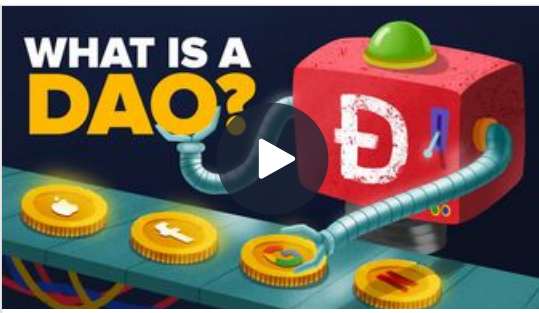

Before having a DAO, I was already seeding and flourishing a chat group of blockchain developers. Even though there is a lot of engagement in the chat channel, in a DAO things get more serious. The sense of commitment is much more developed. Juliana, Summoner of Meta Gamma Delta

House of DAOs | MetaGame Wiki

Wait, WTF are DAOs??? Short for "Decentralized Autonomous Organizations", DAOs are a new type of organization, enabled by blockchain technology. Decentralized organizations are nothing new, what makes DAOs different from "just" decentralized organizations is that they are constituted on the blockchain and their governance is, at least in theory, controlled by smart contracts.

Fair Launch, Transmutation, Proof of Contribution, and \$HAUS

Welcome to the DAOhaus Castle Wall, where we talk about all the cool stuff we're building. If you like what you read, please consider subscribing I've already written a bit on the idea of the "fair launch" for LexDAO, so take a look over there if you want to chase the rabbit hole deeper on questions like "what is fairness anyway?"

Four (and a half) Steps to Start a DAO-Powered Digital Community.

Here in the Haus we like to say that we're building a platform for "magic internet communities." With a slogan like that, as you might imagine, we get a lot of people who want to know how to start start their own digital community. You might also imagine that our answer is, "Great!"

Decentralized autonomous organization - Wikipedia

A decentralized autonomous organization (DAO), sometimes called a decentralized autonomous corporation (DAC), is an organization represented by rules encoded as a computer program that is transparent, controlled by the organization members and not influenced by a central government. A DAO's financial transaction record and program rules are maintained on a blockchain.
